

Rani Abu Raia

QA Automation Engineer | Java, TestNG, Selenium, AWS
raniab25@icloud.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | +972-52-484-7811

SUMMARY

QA Engineer with 2 years automating test infrastructure (TestNG, Selenium, AWS) and building validation tools, now applying AI to accelerate testing workflows

EXPERIENCE

TovTech – AI & Software Developer, Remote (*Jun 2026 – Present*)

- Deployed full-stack applications with React frontends, Flask backends, and Cloudflare Workers for edge computing, using MongoDB and PostgreSQL
- Created a custom Claude Code skill (learn-sync) for automatic course-progress synchronization between the agent environment and a production learning platform
- Built and deployed an AI-powered WhatsApp customer support system (Gemini API, Cloudflare Workers, Supabase, Next.js) with a live agent dashboard

Amdocs – Quality Assurance Engineer, Nazareth (*Oct 2021 – Feb 2023*)

- Automated regression test cases using TestNG, improving test coverage and release velocity
- Optimized Linux testing environments that utilize C++ libraries and binaries
- Collaborated with Agile/Scrum teams, managed user stories in Jira.
- Implemented automated testing on AWS EC2 and S3, validating deployments across staging and production environments

SKILLS

Languages: Arabic (Native), Hebrew (Proficient), English (Fluent)

Programming Languages: Java, Python, C, C++, SQL

Frontend: React, JavaScript, TypeScript, HTML, CSS

Backend/Cloud: Spring Boot, REST API, AWS, Cloudflare, Vercel

Databases: PostgreSQL, MongoDB, Supabase

DevOps/Testing: CI/CD Pipelines, Selenium, TestNG, Test Planning & Documentation (STP/STD)

EDUCATION

Hebrew University of Jerusalem – B.Sc. in Mathematics and B.A. in Business Administration, 2021

PROJECTS

WhatsApp AI Support Bot: Built a WhatsApp support bot, routing requests via the Gemini API with a real-time monitoring dashboard and Supabase integration for conversation history (Jul 2026)

Captain Fix: Built an AI-driven test generator analyzing websites to auto-generate Selenium tests using claude-sonnet-5 with cross-browser validation (Chrome, Firefox, Safari) (Aug 2025)

Bank Management System: a Spring Boot system with REST APIs and Maven for dependencies (May 2024)
